Read all instructions in their entirety before beginning installation.

1. Carefully unpack all components and make certain that everything is on hand.
2. Unscrew Brass Balls from Canopy assembly to release the M-plate. Save the brass balls for later.
3. Using Customer Supplied Hardware, affix the M-plates with studs directly into J-boxes ensuring connections is suitable for a minimum of 20 lbs and that electrical supply wires remain accessible. The slots on the M-plates should be oriented in one direction. See attached drawing for j-boxes location.
4. Raise up the Canopy covers and secure them on studs with Brass balls.
5. Screw the Stem assemblies onto couplings on Fixture frame. Feed wires (from fixture) through the Stem where electrical connections need to be made.
6. Rise Fixture frame with Stems up to Canopies. Slide nuts on the end of each Stem in M-plates slots.
7. Following all local codes and procedures, through Wiring lid make electrical wire connections from supply wires to lead wires.
8. Raise up the Canopy covers and secure them on studs with Brass balls.
9. Install 4 X 60W E26 A19 bulb (not included) into sockets.
10. Power on and ENJOY!
